Cautionary Statement Regarding Forward-Looking Statements

We have made statements in this document that are forward-looking statements within the meaning of the federal securities laws, including the Private Securities Litigation Reform Act of 1995. You can identify forward-looking statements by the use of forward-looking terminology such as "believes," "expects," "could," "would," "may," "might," "will," "should," "seeks," "likely," "intends," "plans," "projects," "predicts," "estimates," "forecast" or "anticipates" or the negative of these words and phrases or similar words or phrases that are predictions of or indicate future events or trends and that do not relate solely to historical matters. You can also identify forward-looking statements by discussions of strategy, plans or intentions related to our capital resources, portfolio performance and results of operations. Forward-looking statements involve numerous risks and uncertainties and you should not rely on them as predictions of future events. Forward-looking statements depend on assumptions, data or methods that may be incorrect or imprecise and may not be able to be realized. We do not guarantee that the transactions and events described will happen as described (or that they will happen at all). The following factors, among others, could cause actual results and future events to differ materially from those set forth or contemplated in the forward-looking statements: declines in advertising and general economic conditions; competition; government regulation; our inability to increase the number of digital advertising displays in our portfolio; taxes, fees and registration requirements; our ability to obtain and renew key municipal contracts on favorable terms; decreased government compensation for the removal of lawful billboards; content-based restrictions on outdoor advertising; environmental, health and safety laws and regulations; seasonal variations; acquisitions and other strategic transactions that we may pursue could have a negative effect on our results of operations; dependence on our management team and advertising executives; the ability of our board of directors to cause us to issue additional shares of stock without stockholder approval; certain provisions of Maryland law may limit the ability of a third party to acquire control of us; our rights and the rights of our stockholders to take action against our directors and officers are limited; our substantial indebtedness; restrictions in the agreements governing our indebtedness; incurrence of additional debt; interest rate risk exposure from our variable-rate indebtedness; our ability to generate cash to service our indebtedness; cash available for distributions; hedging transactions; diverse risks in our international business; a breach of our security measures; failure to comply with regulations regarding privacy and data protection; the financial information included in our filings with the Securities and Exchange Commission (the "SEC") may not be a reliable indicator of our future results; asset impairment charges for goodwill; our failure to remain qualified to be taxed as a real estate investment trust ("REIT"); REIT distribution requirements; availability of external sources of capital; we may face other tax liabilities even if we remain qualified to be taxed as a REIT; complying with REIT requirements may cause us to liquidate investments or forgo otherwise attractive opportunities; our ability to contribute certain contracts to a taxable REIT subsidiary ("TRS"); our planned use of TRSs may cause us to fail to remain qualified to be taxed as a REIT; REIT ownership limits; complying with REIT requirements may limit our ability to hedge effectively; failure to meet the REIT income tests as a result of receiving non-qualifying income; even if we remain qualified to be taxed as a REIT, and we sell assets, we could be subject to tax on any unrealized net built-in gains in the assets held before electing to be treated as a REIT; the Internal Revenue Service (the "IRS") may deem the gains from sales of our outdoor advertising assets to be subject to a 100% prohibited transaction tax; establishing an operating partnership as part of our REIT structure; our limited operating history as a REIT; we may not be able to engage in desirable strategic or capital-raising transactions as a result of our separation from CBS Corporation, and we could be liable for adverse tax consequences resulting from engaging in significant strategic or capital-raising transactions; and other factors described in our filings with the SEC, including but not limited to the section entitled "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2015, filed with the SEC on February 29, 2016. All forward-looking statements in this document apply as of the date of this document or as of the date they were made and, except as required by applicable law, we disclaim any obligation to publicly update or revise any forward-looking statement to reflect changes in underlying assumptions or factors of new information, data or methods, future events or other changes.

Non-GAAP Financial Measures

This presentation includes certain non-GAAP financial measures intended to supplement, not substitute for, comparable GAAP financial measures. Reconciliations of non-GAAP financial measures to GAAP financial measures are provided in the Appendix of this presentation.

Prior period presentation conforms to current period reporting classifications. Numbers in this presentation may not sum due to rounding.

Non-GAAP Reconciliations

Non-GAAP Financial Measures

In addition to the results prepared in accordance with generally accepted accounting principles in the United States (“GAAP”) provided throughout this document, this document and the accompanying tables include non-GAAP financial measures as described below. We calculate revenues on a constant dollar basis as reported revenues excluding the impact of foreign currency exchange rates between periods. We provide constant dollar revenues to understand the underlying growth rate of revenue excluding the impact of changes in foreign currency exchange rates between periods, which are not under management’s direct control. Our management believes constant dollar revenues are useful to users of our financial data because it enables them to better understand the level of growth of our business period to period. We calculate organic revenues as reported revenues excluding revenues associated with significant acquisitions and divestitures, revenues associated with business lines we no longer operate, and the impact of foreign currency exchange rates (“non-organic revenues”). We provide organic revenues to understand the underlying growth rate of revenue excluding the impact of non-organic revenue items. Our management believes organic revenues are useful to users of our financial data because it enables them to better understand the level of growth of our business period to period. We calculate and define "Adjusted OIBDA" as operating income (loss) before depreciation, amortization, net (gain) loss on dispositions, stock-based compensation, restructuring charges and loss on real estate assets held for sale. We calculate Adjusted OIBDA margin by dividing Adjusted OIBDA by total revenues. Adjusted OIBDA and Adjusted OIBDA margin are among the primary measures we use for managing our business, evaluating our operating performance and planning and forecasting future periods, as each is an important indicator of our operational strength and business performance. Our management believes users of our financial data are best served if the information that is made available to them allows them to align their analysis and evaluation of our operating results along the same lines that our management uses in managing, planning and executing our business strategy. Our management also believes that the presentations of Adjusted OIBDA and Adjusted OIBDA margin, as supplemental measures, are useful in evaluating our business because eliminating certain non-comparable items highlight operational trends in our business that may not otherwise be apparent when relying solely on GAAP financial measures. It is management’s opinion that these supplemental measures provide users of our financial data with an important perspective on our operating performance and also make it easier for users of our financial data to compare our results with other companies that have different financing and capital structures or tax rates. We calculate Funds From Operations ("FFO") in accordance with the definition established by the National Association of Real Estate Investment Trusts (“NAREIT”). FFO reflects net income (loss) adjusted to exclude gains and losses from the sale of real estate assets, depreciation and amortization of real estate assets, amortization of direct lease acquisition costs and the non-cash effect of loss on real estate assets held for sale, as well as the same adjustments for our equity-based investments, as applicable. We calculate Adjusted AFFO ("AFFO") as FFO adjusted to include cash paid for direct lease acquisition costs as such costs are generally amortized over a period ranging from four weeks to one year and therefore are incurred on a regular basis. AFFO also includes cash paid for maintenance capital expenditures since these are routine uses of cash that are necessary for our operations. In addition, AFFO excludes costs related to restructuring charges, as well as certain non-cash items, including non-real estate depreciation and amortization, deferred income taxes, stock-based compensation expense, accretion expense, the non-cash effect of straight-line rent and amortization of deferred financing costs. We use FFO and AFFO measures for managing our business and for planning and forecasting future periods, and each is an important indicator of our operational strength and business performance, especially compared to other real estate investment trusts ("REITs"). Our management believes users of our financial data are best served if the information that is made available to them allows them to align their analysis and evaluation of our operating results along the same lines that our management uses in managing, planning and executing our business strategy. Our management also believes that the presentations of FFO, AFFO, and related per weighted average share amounts and dividend payout ratios, as supplemental measures, are useful in evaluating our business because adjusting results to reflect items that have more bearing on the operating performance of REITs highlight trends in our business that may not otherwise be apparent when relying solely on GAAP financial measures. It is management’s opinion that these supplemental measures provide users of our financial data with an important perspective on our operating performance and also make it easier to compare our results to other companies in our industry, as well as to REITs. We calculate Free Cash Flow (“FCF”) as net cash flow provided by operating activities less capital expenditures. We use FCF for managing our business, including evaluating cash available for dividends, debt service and strategic investments and acquisitions. Our management believes users of our financial data are best served if the information that is made available to them allows them to align their analysis and evaluation of our operating results along the same lines that our management uses in managing, planning and executing our business strategy. It is management’s opinion that this supplemental measure provides users of our financial data with an important perspective on our operating performance and also makes it easier to compare our results to other companies in our industry, as well as to REITs. Since constant dollar revenues, organic revenues, Adjusted OIBDA, Adjusted OIBDA margin, FFO, AFFO and FCF and, as applicable, related per weighted average share amounts and dividend payout ratios, are not measures calculated in accordance with GAAP, they should not be considered in isolation of, or as a substitute for, revenues, operating income (loss), net income (loss), net cash flow provided by operating activities and net income (loss) per common share for basic and diluted earnings per share ("EPS"), the most directly comparable GAAP financial measures, as indicators of operating performance. These measures, as we calculate them, may not be comparable to similarly titled measures employed by other companies. In addition, these measures do not necessarily represent funds available for discretionary use and are not necessarily a measure of our ability to fund our cash needs.
