1 Risk Factors

Investing in the Bonds issued by Höegh LNG Holdings Ltd involves inherent risks. Prospective investors should consider, among other things, the risk factors set out in the Prospectus, before making an investment decision. The risks and uncertainties described in the Prospectus, are risks of which the Issuer is aware and that the Issuer considers to be material to its business. If any of these risks were to occur, the Issuer's business, financial position, operating results or cash flows could be materially adversely affected, and the Issuer could be unable to pay interest, principal or other amounts on or in connection with the Bonds.

Prospective investors should also read the detailed information set out in the Registration Document dated 22 September 2015 and reach their own views prior to making any investment decision.

Risk related to the Bonds

General

All investments in interest bearing securities have risk associated with such investment. The risk is related to the general volatility in the market for such securities, varying liquidity in a single bond issue as well as company specific risk factors. There are four main risk factors that sum up the investors total risk exposure when investing in interest bearing securities: liquidity risk, interest rate risk, settlement risk and market risk (both in general and issuer specific).

Liquidity risk

The liquidity of the trading market in the Bonds, and the market price quoted for the Bonds, may be adversely affected by changes in the overall market for similar yield securities, interest rates and the Issuer's financial performance or prospects or in the prospects for companies in its industry generally. As a result, an active trading market for the Bonds may not develop or be maintained.

Historically, the markets for non-investment grade debt, such as the Bonds, have been subject to disruptions that have caused substantial volatility in their prices. Any market for the Bonds may be subject to similar disruptions. Any such disruptions may affect the liquidity and trading of the Bonds independently of the Issuer's financial performance and prospects and may have an adverse effect on the holders of the Bonds.

No market-maker agreement has been entered into in relation to this Bond Issue, and the liquidity of the bonds will at all times depend on the market participants view of the credit quality of the Issuer as well as established and available credit lines.

Interest rate risk

Interest rate risk is the risk that results from the variability of the LIBOR interest rate. The coupon payments, which depend on the LIBOR interest rate and the Margin, will vary in accordance with the variability of the LIBOR interest rate. The interest rate risk related to this Bond Issue will be limited, since the coupon rate will be adjusted quarterly according to the change in the reference interest rate (LIBOR 3 months) over the 5 year tenor. The primary price risk for a floating rate bond issue will be related to the market view of the correct trading level for the credit spread related to the Bond Issue at a certain time during the tenor, compared with the credit margin the Bond Issue is carrying. A possible increase in the credit spread trading level relative to the coupon defined credit margin may relate to general changes in the market conditions and/or Issuer specific circumstances. However, under normal market circumstances the anticipated tradable credit spread will fall as the duration of the Bond Issue becomes shorter. In general, the price of bonds will fall when the credit spread in the market increases, and conversely the price of bonds will increase when the market spread decreases.

Settlement risk

The settlement risk (being the risk that the settlement of Bonds does not take place as agreed) consists of the failure to pay or the failure to deliver the Bonds.

Credit risk

Credit risk is the risk that the Borrower fails to make the required payments under the Bond Issue (either principal or interest).

Market risk

Market risk, also called "systematic risk," is the negative impact in the value of the Bonds caused by any type of major natural disaster, such as recessions, political turmoil, changes in interest rates, terrorist attacks, etc. The price of a single bond issue will fluctuate in accordance with the interest rate and credit markets in general, the market view of the credit risk, and the liquidity of this Bond Issue in the market. In spite of an underlying positive development in the Issuer's business activities, the price of the Bonds may fall independent of this fact. Bond issues with a relatively short tenor and a floating rate coupon rate do however in general carry a lower price risk compared to bonds with a longer tenor and/or with a fixed coupon rate.

Ranking of the Bonds

The Bonds constitute senior unsecured obligations of the Issuer. As such, the Bonds are effectively subordinated to the secured debt of the Issuer and any debt of the Issuer's subsidiaries outstanding from time to time. The Bonds rank equally in right of payment with the Issuer's senior unsecured debt outstanding from time to time and senior in right of payment to the Issuer's subordinated debt (if any) outstanding from time to time. The secured creditors of the Issuer will have priority over the assets securing their debt. In the event that such secured debt becomes due or a secured lender proceeds against the assets that secure the debt, the assets would be available to satisfy obligations under the secured debt before any payment would be made on the Bonds. Any assets remaining after repayment of its secured debt may not be sufficient to repay all amounts owing under the Bonds.

Risk related to Bonds in general*Modification and Waiver*

The conditions of the Bonds contain provisions for calling meetings of Bondholders to consider matters affecting their interests generally. These provisions permit defined majorities to bind all Bondholders including Bondholders who did not attend and vote at the relevant meeting and Bondholders who voted in a manner contrary to the majority.

The conditions of the Bonds also provide that the Bond Trustee may:

- (i) Except as provided for in Bond Agreement clause 17.1.5, reach decisions binding for all Bondholders concerning the Bond Agreement, including amendments to the Bond Agreement and waivers or modifications of certain provisions, which in the opinion of the Bond Trustee, do not have a material adverse effect on the rights or interests of the Bondholders pursuant to the Bond Agreement.
- (ii) Except as provided for in the Bond Agreement clause 17.1.5, reach decisions binding for all Bondholders in circumstances other than those mentioned in the Bond Agreement clause 17.1.3 provided prior notification has been made to the Bondholders. The Bond Trustee may not reach a decision binding for all Bondholders in the event that any Bondholder submits a written protest against the proposal within a deadline set forth in the Bondholder notification.
- (iii) Not reach decisions pursuant to the Bond Agreement clauses 17.1.3 or 17.1.4 for matters set forth in the Bond Agreement clause 16.3.5 except to rectify obvious incorrectness, vagueness or incompleteness.
- (iv) Not adopt resolutions which may give certain Bondholders or others an unreasonable advantage at the expense of other Bondholders.
