

## **Trimble Introduces T-Ticket Mobile Citation Software for Law Enforcement**

### **Wireless-Enabled, Rugged Handheld Computer with Citation Writing Software Integrates with Law Enforcement Databases for Improved Speed, Accuracy**

**MIAMI, Sept. 26, 2005** -- today introduced T-Ticket™ mobile citation software bundled with the Trimble® Recon® rugged handheld computer. T-Ticket software streamlines and improves the accuracy of the citation process. It allows officers in the field to query national and regional databases wirelessly for automatic completion of violator information.

The announcement was made today at the 112th Annual Conference of the International Association of Chiefs of Police.

T-Ticket gives police officers a complete package with intuitive software, a field-proven, rugged handheld and wireless connectivity. It automates routine tasks to save officers time, reduce errors and eliminate paperwork.

Featuring easy-to-use, step-by-step screens and auto-fill fields, T-Ticket software helps police officers write tickets faster and more accurately. Officers can use T-Ticket's wireless connection to query regional and national databases to auto-complete much of the citation information. They can also check on a person's outstanding tickets or warrants, run a license plate check and upload the completed citations to the police department's database.

Trimble's Recon handheld computer provides an ideal handheld computing platform for T-Ticket mobile citation software. The Recon is designed for reliable performance in outdoor environments. It meets MIL-STD-810F military standards for drops, vibration and temperature extremes. It is also impervious to water and dust with an IP67 rating. The Recon's color touchscreen is bright and sharp, and T-Ticket includes both day and night setting for clear visibility. The Recon weighs just 17 ounces, its rounded edges provide a comfortable grip, and it comes with a 15-hour rechargeable NiMH battery.

Trimble developed T-Ticket with input from police departments and the Portland Police Bureau in Oregon served as a beta test site.

The Trimble T-Ticket mobile citation software is available now.

#### **About Trimble**

Trimble is a leading innovator of Global Positioning System (GPS) technology. In addition to providing advanced GPS components, Trimble augments GPS with other positioning technologies as well as wireless communications and software to create complete customer solutions. Trimble's worldwide presence and unique capabilities position the Company for growth in emerging applications including surveying, automobile navigation, machine guidance, asset tracking, wireless platforms, and telecommunications infrastructure. Founded in 1978 and headquartered in Sunnyvale, California, Trimble has more than 2,000 employees in more than 20 countries worldwide.
