About Trimble

Trimble applies technology to make field and mobile workers in businesses and government significantly more productive. Solutions are focused on applications requiring position or location-including surveying, construction, agriculture, fleet and asset management, public safety and mapping. In addition to utilizing positioning technologies, such as GPS, lasers and optics, Trimble solutions may include software content specific to the needs of the user. Wireless technologies are utilized to deliver the solution to the user and to ensure a tight coupling of the field and the back office. Founded in 1978 and headquartered in Sunnyvale, Calif., Trimble has a worldwide presence with more than 3,400 employees in over 18 countries.

FTRMB

Minimum Requirements to listen to broadcast:

The Windows Media Player software, downloadable free from <http://www.microsoft.com> and at least a 56Kbps connection to the Internet. If you experience problems listening to the webcast, send an E-mail to: webcast@multivu.com.
