

Trimble Sets Date for International User Conference

Trimble Dimensions 2012 for Surveying, Engineering, Construction, Mapping, GIS, GeoSpatial, Infrastructure, Utilities and Field Service Management Professionals

SUNNYVALE, Calif., March 6, 2012 /PRNewswire/ -- Trimble (NASDAQ: TRMB) announced today that its International User Conference—Trimble Dimensions—is scheduled for November 5-7, 2012 at the Mirage Hotel in Las Vegas, Nevada.

Trimble Dimensions 2012 will provide insight into how information technology can transform the way surveying, engineering, construction, mapping, GIS, geospatial, utilities and field service management professionals work to achieve success.

"Now in its sixth year, Trimble Dimensions provides an excellent forum for organizations to explore how they can continue to drive transformation, shape the future of their industry and gain a competitive edge through the use of information technology," said Steven W. Berglund, Trimble's president and CEO.

Attendees will have the opportunity to participate in a variety of knowledge sharing and break out sessions, network with key industry leaders, build partnerships, develop new contacts, discuss opportunities and discover how to overcome challenges in today's competitive business environment. Highlights include educational sessions and specialized tracks to advance career objectives with many sessions qualifying for Professional Development Hour (PDH) credits.

The conference offers an off-site demonstration and training area plus a Partner Pavilion that will showcase the complete suite of Trimble construction, survey, engineering, aerial and mobile mapping, railway, transportation and logistics, field service, mapping, GIS, utilities, mobile computing, agriculture, forestry and infrastructure solutions, including products from Accubid, Applanix, Meridian Systems, Pacific Crest, PeopleNet, Plancal, QuickPen and Tekla. Highlighted solutions and technologies will include GNSS; total stations; field computing and data collection; 3D scanning; pre-design construction planning; machine control; 3D visualization; Building Information Modeling (BIM); construction project management; aerial and mobile mapping; wireless communications; data transfer; field and office software; and smart grid applications. In addition, technology providers who are Trimble partners will participate to extend the conference's range of products and applications.

About Trimble

Trimble applies technology to make field and mobile workers in businesses and government significantly more productive. Solutions are focused on applications requiring position or location—including surveying, construction, agriculture, fleet and asset management, public safety and mapping. In addition to utilizing positioning technologies, such as GPS, lasers and optics, Trimble solutions may include software content specific to the needs of the user. Wireless technologies are utilized to deliver the solution to the user and to ensure a tight coupling of the field and the back office. Founded in 1978, Trimble is headquartered in Sunnyvale, Calif.
