Trimble Company, Cengea Solutions, Awarded Oregon Department of Forestry Contract to Provide State Forest Revenue System

SUNNYVALE, Calif., June 7, 2012 /PRNewswire/ -- Trimble (NASDAQ: TRMB) announced today that Cengea Solutions, a Trimble Company, has been awarded a contract by the Oregon Department of Forestry (ODF) to provide a State Forest Revenue System (SFRS) to support the agency in achieving its specific business mission. All state forest lands are actively managed under adopted forest management plans to provide economic, environmental and social benefits to Oregonians. Revenue from timber sales goes to county governments and local public school districts, and from Common School Forest Lands to benefit public schools throughout the state.

ODF intends to replace its existing system with a more robust and versatile Commercial-Off-the-Shelf (COTS) solution to support current and future business requirements. The SFRS system will manage timber sales from setup of sale to closure of the sale, importing and tracking of log load tickets, management of payments and interfacing to the Statewide Financial Management System.

ODF selected Cengea through a competitive bid process. Cengea offers the necessary business software and spatially-enabled components to help the Department better manage its forests and its assets.

About ODF

The Oregon Department of Forestry was established in 1911. It is under the direction of the State Forester who is appointed by the State Board of Forestry. The agency's main responsibilities are providing fire protection on 16 million acres of forest and grazing land, managing state-owned forestlands, and enforcing laws that protect natural resources during timber harvest and other activities on privately owned lands.

About Cengea

Cengea Solutions Inc., a Trimble Company, provides information technology-based business solutions for resource-based enterprises. Cengea serves the forest products, agriculture, environment, utilities and government markets in North America and around the world. The company offers industry-leading raw material supply chain execution and optimization solutions for the agriculture and forest products sectors. These solutions enable its clients to make sustainable cost reductions and add value to their products by focusing on solving quality, productivity, compliance and operational business challenges. Cengea's clients are some of the world's largest and best-known forest products, agribusiness and conservation organizations as well as small and medium-sized businesses and state and federal departments. The company's 21-year history of serving spatial solutions around the globe puts Cengea in a unique position to understand and help address complex business issues. About Trimble

Trimble applies technology to make field and mobile workers in businesses and government significantly more productive. Solutions are focused on applications requiring position or location—including surveying, construction, agriculture, forestry, fleet and asset management, public safety and mapping. In addition to utilizing positioning technologies, such as GPS, lasers and optics, Trimble solutions may include software content specific to the needs of the user. Wireless technologies are utilized to deliver the solution to the user and to ensure a tight coupling of the field and the back office. Founded in 1978, Trimble is headquartered in Sunnyvale, Calif.
