Trimble Opens Registration for Dimensions User Conference

Trimble Dimensions 2012: the Positioning Conference of the Year

SUNNYVALE, Calif., June 28, 2012 /PRNewswire/ -- Trimble (NASDAQ: TRMB) announced today registration is officially open for its International User Conference—Trimble Dimensions—being held November 5-7, 2012 at the Mirage and the Treasure Island Hotels in Las Vegas. Dimensions is a premiere forum to learn first-hand how to Transform the Way the World Works—specifically for professionals in heavy civil construction, building construction, survey, cadastral, geospatial, infrastructure, mapping and GIS, transportation and logistics, field service management, energy, utilities, natural resources and government.

Trimble Dimensions User Conference is a leading conference that provides insight into how information technology can transform the way professionals work to achieve success. Attendees will be able to take advantage of knowledge sharing, breakout sessions, networking with key industry leaders, building partnerships, developing new contacts, discussing opportunities and discovering how to overcome challenges in today's competitive business environment. Highlights include over 400 educational sessions and more than 30 specialized tracks to advance career objectives with many sessions qualifying for Professional Development Hour (PDH) credits.

For more information, visit www.trimbledimensions.com or send an email to trimble_dimensions@trimble.com.

In addition, interested speakers are encouraged to visit the website to learn more about the conference and submission process. Confirmed speakers will receive a complimentary full registration to the conference. Abstracts can be submitted online at: http://www.trimbledimensions.com/call_for_speakers.aspx.

About Trimble

Trimble applies technology to make field and mobile workers in businesses and government significantly more productive. Solutions are focused on applications requiring position or location—including surveying, construction, agriculture, fleet and asset management, public safety and mapping. In addition to utilizing positioning technologies, such as GPS, lasers and optics, Trimble solutions may include software content specific to the needs of the user. Wireless technologies are utilized to deliver the solution to the user and to ensure a tight coupling of the field and the back office. Founded in 1978, Trimble is headquartered in Sunnyvale, Calif.
