## **Trimble and Doosan Introduce Trimble Ready Excavator in Europe and North America**

MUNICH, April 12, 2016 /PRNewswire/ -- Trimble (NASDAQ:TRMB) and Doosan Infracore announced today that customers in Europe and North America will have the option to order a Trimble Ready<sup>®</sup> Doosan DX225LC-5 excavator from the factory. This new Trimble Ready excavator enables a faster and simplified installation of Trimble<sup>®</sup> GCS900 2D or 3D Grade Control System components with no welding, re-painting, drilling or disassembly required.

The announcement was made at [bauma](#) 2016, the world's leading trade fair for construction machinery, building material machines, mining machines, construction vehicles and construction equipment.

"Doosan Infracore is excited to announce that later this year our customers in Europe and North America will be able to order a DX225LC-5 Trimble Ready excavator that reduces machine downtime during installation of a Trimble GCS900 system," said Wooyong Jung, general manager for Doosan Infracore R&D Division.

"The introduction of a Trimble Ready option for a Doosan excavator further reinforces our commitment to serve equipment manufacturers and their customers with innovative construction technology," said Jim Green, business area director for Trimble OEM Solutions, Civil Engineering and Construction Division. "Now it's less expensive and faster to install Trimble technology, so Doosan customers can realize an even quicker return on their technology investment."

The Trimble GCS900 Grade Control System is a machine control system for earthworks that makes design surfaces, grades and alignments accessible to the operator on a display inside the cab. The system uses GNSS, GPS, laser, sonic or total station technology to accurately position the blade or bucket in real-time, significantly reducing material overages and improving the contractor's productivity and efficiency.

### **Availability**

The Trimble Ready Doosan Infracore DX225LC-5 excavator is expected to be available in the second half of 2016 through Doosan's extensive distribution network in Europe and North America.

### **About Doosan Infracore**

Doosan Infracore is a leader in the infrastructure support business sectors with the portfolio of construction equipment and engines. The company boasts a broad equipment portfolio ranging from excavators to wheel loaders, articulated dump trucks and many more. As a global leader in the construction equipment industry, it helps improve people's quality of life for the better.

### **About Trimble's Civil Engineering and Construction Division**

Trimble is a leading innovator of productivity solutions for the civil engineering and construction sectors. Trimble's solutions leverage a variety of technologies, including Global Navigation Satellite System (GNSS), construction lasers, total stations, wireless data communications, the Internet, and application software. As part of the Trimble Connected Site<sup>®</sup> strategy, these solutions provide a high-level of process and workflow integration from the design phase through to the finished project—delivering significant improvements in productivity throughout the construction lifecycle.

### **About Trimble**

Trimble is transforming the way the world works by delivering products and services that connect the physical and digital worlds. Core technologies in positioning, modeling, connectivity and data analytics enable customers to improve productivity, quality, safety and sustainability. From purpose built products to enterprise lifecycle solutions, Trimble software, hardware and services are transforming a broad range of industries such as agriculture, construction, geospatial and

transportation and logistics. For more information about Trimble (NASDAQ:TRMB), visit: [www.trimble.com](http://www.trimble.com).
