## Registration Now Open for Trimble Dimensions 2016 User Conference

### Three-Day, Action-Packed Conference Designed for Trimble Users to Learn, Collaborate and Network with Peers

SUNNYVALE, Calif., May 31, 2016 /PRNewswire/ -- Trimble (NASDAQ: TRMB) announced today that registration is officially open for its International User Conference—Trimble Dimensions—being held November 7-9, 2016 at The Venetian in Las Vegas, Nevada.

Dimensions 2016 provides insight into how information technology can transform the way professionals work. Attendees will see first-hand how their industry peers use Trimble's end-to-end technology to easily transform data into intelligent, usable information. Attendees will also learn how new tools, processes and ideas can help make a positive impact on their business and discover how to overcome challenges in today's competitive business environment. Throughout the conference, attendees have a variety of opportunities to network with key industry players, nurture existing business relationships and build valuable partnerships.

Conference highlights include:

- | Over 450 educational sessions
- | More than 30 specialized tracks with many sessions qualifying for Professional Development Hours (PDH)
- | On-site product demonstrations showing the latest solutions and workflows
- | Computer software training labs
- | Expo showcasing new products, innovations and technical presentations

For more information or to register for the conference, visit: [trimbledimensions.com](http://trimbledimensions.com). Early bird registration is available until July 31, 2016.

In addition, speakers who are interested in sharing their successes using Trimble solutions are encouraged to visit the Website to learn more about the conference and submission process. Abstracts can be submitted online at [trimbledimensions.com/call\\_for\\_speakers](http://trimbledimensions.com/call_for_speakers).

#### About Trimble

Trimble is transforming the way the world works by delivering products and services that connect the physical and digital worlds. Core technologies in positioning, modeling, connectivity and data analytics enable customers to improve productivity, quality, safety and sustainability. From purpose built products to enterprise lifecycle solutions, Trimble software, hardware and services are transforming a broad range of industries such as agriculture, construction, geospatial and transportation and logistics.
