# Shark® Introduces PowerDetect™ ThermaCharged™ Robot With Thermal Heated Mop Wash and Dry Technology For Next-Level Home Hygiene

2025-10-23

Combining Shark's first ThermaCharged™ heated mop cleaning NeverTouch™ Pro Base with PowerDetect™ intelligent sensors, the new Shark® robot provides powerful suction and precise edge cleaning, beginning each run with a freshly cleaned mop.

NEEDHAM, Mass.--(BUSINESS WIRE)-- SharkNinja, Inc. (NYSE: SN), a global product design and technology company, today announced the Shark® PowerDetect™ ThermaCharged™ 2-in-1 Robot Vacuum and Mop, the first from Shark robots to combine advanced ThermaCharged™ heated mop wash and dry technology with PowerDetect™ smart sensor floor cleaning. This breakthrough innovation combines optimized suction with precision edge cleaning, while the NeverTouch™ Pro Base uses thermal heated mop washing and drying to prevent redepositing dirt, delivering a consistently fresh, hands-free clean.

Designed for busy households, it offers a healthier way to maintain spotless living spaces. The PowerDetect™ ThermaCharged™ was engineered to overcome common robot vacuum limitations with adaptive intelligence, advanced navigation, and an automatic thermal heated mop wash and dry in the base. Unlike conventional robots that spread yesterday's dirt, this one begins every run with a freshly cleaned mop for a truly hygienic clean. Features like NeverStuck™ obstacle climbing and DryGuard™ carpet protection ensure uninterrupted cleaning and dry carpets, setting a new standard for automated hygiene.

"Today's families need more than a surface-level clean, they need a proven clean that protects against what we can't see," said Neil Shah, Chief Commercial Officer at SharkNinja. "The PowerDetect™ ThermaCharged™ NeverTouch

base marks a breakthrough in home hygiene through advanced thermal self-cleaning technology while simplifying how people care for their homes. This innovation underscores our commitment to solving real consumer problems with intelligent solutions, delivering measurable results and exceptional performance.”

The PowerDetect™ ThermaCharged™ 2-in-1 Robot Vacuum and Mop delivers next-level cleaning performance powered by the thermal heated mop wash and dry NeverTouch™ Pro Base. After every mission, the base automatically washes the mop pad with 185°F water and dries it with 175°F heated air using ThermaCharged™ technology. Every time the robot starts, it begins with a freshly cleaned mop so you never clean with yesterday’s mess. It also empties debris into a 60-day capacity bin and refills the water tank—delivering a hands-free, high-performance clean that is automated and effortless.

DirtDetect Technology identifies high-debris zones and boosts suction automatically, while Edge Detect and Floor Detect™ sensors optimize cleaning across every surface—from hardwood to tile to carpet—for a complete, wall-to-wall clean that manual vacuuming and mopping can’t match.

## Intelligence That Adapts to Real Life

Shark built the PowerDetect™ ThermaCharged™ for real homes with real messes. It navigates everyday obstacles with ease. NeverStuck™ technology climbs over thresholds up to 0.7 inches, and a DryGuard™ Guarantee ensures carpets stay 100% dry because it knows to leave the mop at the base while vacuuming. AI-powered object detection recognizes and avoids objects in areas—removing the need for pre-clean prep. With up to three hours of runtime, it delivers edge-to-edge cleaning that seamlessly adapts to dynamic household needs.

## A Proven Clean with Measurable Results

The ThermaCharged™ system represents a major advancement™ in robotic cleaning. Through controlled thermal application during the automated mop-wash cycle in the base, invisible messes on the mop pad are removed after every clean —not just visible dirt—the PowerDetect™ ThermaCharged™ helps families maintain a healthier home environment with every clean.

The Shark® PowerDetect™ ThermaCharged™ 2-in-1 Robot Vacuum and Mop is now available for purchase online and in-store at Amazon, Target, and Best Buy, with retail pricing starting at \$1,099.99 to \$1,299.99.
