Too Hot? Too Cold? Shark's New Line of Air Purifiers is Just Right

9/22/2022

New product innovations go beyond standard air purification to offer comfort in every season

NEEDHAM, Mass., Sept. 22, 2022 /PRNewswire/ -- **Shark**, America's #1 Vacuum Brand¹, continues to revolutionize and disrupt the air purification market with two new air cleaning innovations that offer heating and a cooling fan, bringing consumers the confidence of clean air with the comfort of the perfect air temperature.

Debuting in two sizes, the versatile **Shark® Air Purifier 3-in-1 MAX with True HEPA** and the compact **Shark® Air Purifier 3-in-1 with True HEPA** both feature an air purifier, fan, and heater all-in-one with Clean Sense IQ™.

The Shark® Air Purifier 3-in-1 MAX with True HEPA and the Shark® Air Purifier 3-in-1 with True HEPA feature an air purifier, fan and heater all in one unit. Consumers can choose between three modes: purified air, purified heat, or purified fan for comfort in every moment.

The Shark® Air Purifier 3-in-1 MAX with True HEPA and the Shark® Air Purifier 3-in-1 with True HEPA feature an air purifier, fan and heater all in one unit. Consumers can choose between three modes: purified air, purified heat, or purified fan for comfort in every moment.

These must-have air purifiers constantly provide clean air at the right temperature for comfort throughout the year for four seasons of pure air quality. Featuring three modes - purified air, purified heat, and purified fan - there's a mode for everyone in one's home. That means no more fighting over the thermostat, even if households prefer different temperatures.

During colder months or year-round for those who run cold naturally, switch to purified heat mode for heated and purified air at the same time. Thermal Comfort Control technology intelligently adjusts and maintains the desired temperature while heating up the room without getting too hot. For warmer months, purified fan mode cools and purifies the air simultaneously. It can also quietly purify the air at its current temperature in purified air mode.

"In our second year of air purification, we're excited to continue growing in this category with new and improved technology that offers even more benefits to positively impact people's lives," said Julien Levesque, Vice President of Product Development, SharkNinja. "As people continue to focus on holistic wellness, we are on a mission to help them eliminate airborne allergens, dust, dander, and particles from the air in homes. We are confident they will like the temperature control option, especially during the hotter and colder months, and breathe easily at home, knowing the air is clean thanks to our proprietary Clean Sense IQ™ technology."

Designed to purify spaces up to 1,000 square feet, the Shark® Air Purifier 3-in-1 MAX with True HEPA is made for large bedrooms or kitchens, and the compact Shark® Air Purifier 3-in-1 with True HEPA for offices, bedrooms, or spaces as large as 500 square feet.

Along with heating and cooling fan capabilities, the purifiers feature Shark's Clean Sense IQ™ technology, which tracks air quality around the clock and auto-adjusts power to constantly maintain clean air. The easy-to-use control panel displays data in real time to give consumers clean air confidence.

Pet owners will delight in this powerful purifier, knowing it is designed with Shark's Nanoseal filter to capture 99.98 percent² of large, small and micro-sized particles from air inside the home. With true HEPA filtration capturing bad pet odors and dander, consumer's furry roommate can roam freely throughout the space without lingering allergens or smells.

The **Shark® Air Purifier 3-in-1 MAX with True HEPA** is available for \$449.99 and the **Shark® Air Purifier 3-in-1 with True HEPA** is available for \$399.99 on SharkClean.com. The air purifiers are also available at other major retailers, including **Amazon** and **Best Buy**.
