

American Airlines Names Steven Graves Vice President of Enterprise Technology Services

11/28/2018

FORT WORTH, Texas — American Airlines today announced that Steven Graves has been promoted to Vice President of Enterprise Technology Services. He succeeds Kendall Lock, who assumes the role of Vice President of Airline Operations Technology from Todd Christy, who will retire at the end of the year. Both vice presidents will report to Maya Leibman, American's Executive Vice President and Chief Information Officer.

In this role, Steven will be responsible for IT operations, network, end-user computing, telecommunications and vendor management.

"As American transforms the way we deliver technology, Steven has demonstrated a strong commitment to delivering results and has proven himself as an inspirational, hands-on leader," said Maya. "I look forward to working in close partnership with Steven to lead our team — and company — into the future."

Since he joined American earlier this year, Steven has led automation efforts that have significantly reduced turnaround time for the infrastructure team in his role as Managing Director of Enterprise Infrastructure Services. Steven has more than 20 years of leadership in banking, retail and food distribution companies and has led teams to adopt DevOps and Agile methodologies. He holds a bachelor's degree in Business Administration from Franklin University and is a member of the American Management Association.

Steven Graves, Vice President, Enterprise Technology Services
