Girl-powered coding takes flight

5/9/2019

Get a behind-the-scenes look at how a select group of middle schoolers took on some of the world's most troubling problems with coding. The coders – all daughters of American team members – received valuable exposure to real-life STEM applications and had some serious fun along the way. The girls, ages 11 to 14, participated in American and Mastercard's first Girls4Tech Takes Flight hackathon this past weekend as part of Hack Wars VI in Dallas. Learn more about the two-day event and the excellent applications these girls in the video below.
