

NEWS RELEASE

## American Airlines Announces Schedule of Final MD-80 Revenue Flights

6/24/2019

On Sept. 4, American Airlines will retire its last 26 McDonnell Douglas MD-80 aircraft. The MD-80, also known as the Super 80, was the workhorse of the airline's fleet throughout the 1980s and beyond, providing customers and team members with heartfelt memories on adventures ranging from family vacations to key business trips. It's a bittersweet but well-earned retirement as American celebrates the aircraft's history while modernizing its fleet.
