# A conversation about building a global network

5/23/2024

How does American Airlines build a comprehensive global network? Alliances and Network Planning work together day in and day out to find new ways to connect our customers to the places they want to visit. From supporting a new flight to Australia or Japan to building new partnerships in South America, the teams constantly look for new and unique ways to provide customers seamless travel to global destinations.

Jeff DeLeon, Senior Manager of Strategic Partnerships, sits down with Mehartaaj Grewal, Manager of International Long-Haul Network Planning, to discuss their teams work together to add new flights to destinations our customers can't wait to visit.

Go beyond the episode:

- **American Airlines becomes only U.S. carrier to fly between New York and Tokyo**
- **Bound for Brisbane: American Airlines to fly Down Under next winter**
