The AES Corporation

Third Quarter 2018 Financial Review

Safe Harbor Disclosure

Certain statements in the following presentation regarding AES' business operations may constitute "forward-looking statements." Such forward-looking statements include, but are not limited to, those related to future earnings growth and financial and operating performance. Forward-looking statements are not intended to be a guarantee of future results, but instead constitute AES' current expectations based on reasonable assumptions. Forecasted financial information is based on certain material assumptions. These assumptions include, but are not limited to, accurate projections of future interest rates, commodity prices and foreign currency pricing, continued normal or better levels of operating performance and electricity demand at our distribution companies and operational performance at our generation businesses consistent with historical levels, as well as achievements of planned productivity improvements and incremental growth from investments at investment levels and rates of return consistent with prior experience. For additional assumptions see Slide 53 and the Appendix to this presentation. Actual results could differ materially from those projected in our forward-looking statements due to risks, uncertainties and other factors. Important factors that could affect actual results are discussed in AES' filings with the Securities and Exchange Commission including but not limited to the risks discussed under Item 1A "Risk Factors" and Item 7: "Management's Discussion & Analysis" in AES' 2017 Annual Report on Form 10-K, as well as our other SEC filings. AES undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Reconciliation to U.S. GAAP Financial Information

The following presentation includes certain "non-GAAP financial measures" as defined in Regulation G under the Securities Exchange Act of 1934, as amended. Schedules are included herein that reconcile the non-GAAP financial measures included in the following presentation to the most directly comparable financial measures calculated and presented in accordance with U.S. GAAP.

Executing Our Strategy and Delivering Strong Financial Results

- Q3 2018 Adjusted EPS¹ of \$0.35 (up 52%), YTD \$0.88 (up 35%)
- Reaffirming outlook through 2020
- Optimizing our returns by selling 24% of our stake in sPower's operating portfolio
 - ▶ Improving our return on original sPower investment to 13%
- Growing our backlog to 5.7 GW, including 1.9 GW of PPAs signed year-to-date
 - ▶ First two long-term green blend and extend PPAs with existing customers in Chile and Mexico for 576 MW
- Advancing our LNG strategy with long-term agreements for 25 TBTU of excess capacity signed year-to-date
- Deploying new technologies, including battery-based energy storage
 - ▶ Fluence JV with Siemens awarded more than 250 MW year-to-date

1. A non-GAAP financial measure. See Appendix for definition and reconciliation to the nearest GAAP measure.

Optimizing Returns: Delivering Attractive Risk-Adjusted Returns

Focus: Natural Gas & Renewables with Long-Term, USD-Denominated Contracts

Levered After-Tax Returns on 2017-2018 Renewable Growth Investments

1. Mexico, Central America and the Caribbean.

Growing Our Backlog: New Long-Term Contracts for Renewables (PPAs)

On Track to Sign 7.5 GW of Renewable PPAs Through 2020

1. For each year, half the projected amount is expected to come on-line in the following year and the remaining half in the second year. Thus, the projected amount through 2020 would all be on-line by 2022.

Green Blend and Extend: Profitably Extending Contracts by Leveraging Competitive Advantages

- Well-positioned to negotiate long-term renewable PPAs by leveraging existing:
 - ▶ Platform companies
 - ▶ Thermal power supply contracts
 - ▶ Customer relationships
- Near-term addressable universe of 7 GW across our portfolio
 - ▶ Focusing on: Chile, Mexico and United States

Executing on Green Blend and Extend Strategy

270 MW Candelaria in Chile

- Signed an up to 18-year¹ contract extension to existing contract expiring in 2022
 - ▶ Replacing thermal energy with renewables
 - ▶ Same offtaker
- Replaces 40% of Gener's existing thermal PPAs expiring in 2022
 - ▶ Gener's average contract life is now 11 years

306 MW Mesa La Paz in Mexico

- 25-year wind PPA to expand presence in Mexico
- Leveraged relationship with existing customer, Peñoles
 - ▶ Extends average contract life from 8 years to 17 years
- Project under construction and expected to come on-line in 1H 2020

1. Signed a 13-year contract with a 5-year extension.

Profitable Growth: 5.0 GW Currently Under Construction or Recently Completed

1. Includes 100 MW Alamos Energy Center, which is expected to come on-line in 1H 2021.

Profitable Growth: Southland in California

1,284 MW CCGT and 100 MW Energy Storage

- 20-year PPAs with Southern California Edison
- COD¹ of 1,284 MW CCGT expected in 1H 2020
- 100 MW of 4-hour duration energy storage coming on-line in 1H 2021

1. Commercial Operations Date.

Remaining Construction Projects Advancing as Planned

1,320 MW OPGC 2 in India COD¹: 2H 2018

531 MW Alto Maipo in Chile COD¹: 2H 2020

1. Commercial Operations Date.

Profitable Growth: Pioneering Solar + Storage

Two Projects: 47 MW of Solar Plus 170 MWh of Energy Storage in Hawaii

- 25-year PPAs with Kaua'i Island Utility Cooperative (KIUC)
- Provides peaking capacity and 24/7 energy
- At 170 MWh, it will be the biggest solar + storage installation in the world
- COD¹ expected in 2018-2019

1. Commercial Operations Date.

Current Backlog of 5.7 GW; On Pace to Sign 5.6 GW of Additional PPAs Through 2020

Backlog = Under Construction + Signed PPAs

Note: 2019 includes COD of 67.5 MW of projected PPAs; 2021-2022 includes COD of 370 MW of signed PPAs.

1. Includes half of capacity signed in 2019 and all capacity signed in 2020, as shown on Slide 5.

Own Only Two LNG Storage Terminals in Central America and the Caribbean with Exporting Capability

- Annual installed capacity of 150 TBTU
- Year-to-date, signed three long-term contracts for 25 TBTU annually beginning in 2021
- Remaining 60 TBTU excess capacity presents future upside

Fluence Energy Storage Joint Venture with Siemens

- Year-to-date
 - ▶ Signed contracts for 251 MW
 - ▶ Delivered and installed 58 MW
- Our global presence
 - ▶ Delivered 273 MW
 - ▶ Awarded 428 MW
 - ▶ 75 projects in 16 countries

Q3 2018 Financial Review

- Q3 2018 results
 - ▶ Adjusted EPS¹
 - ▶ Adjusted PTC¹ by Strategic Business Unit (SBU)
- Improving credit profile
- Parent capital allocation plan

1. A non-GAAP financial measure. See Appendix for definition.

Q3 2018 Adjusted EPS¹ Increased \$0.12

1. A non-GAAP financial measure. See Appendix for definition and reconciliation to the nearest GAAP measure.

Q3 Financial Results

\$ in Millions

- Higher Adjusted PTC¹ driven primarily by:
 - ▶ South America: higher contributions from Chile, Colombia and Argentina
 - ▶ US and Utilities: higher energy sales at Southland in California
 - ▶ Lower Parent interest expense

1. A non-GAAP financial measure. See Appendix for definition and reconciliation to the nearest GAAP measure.

Q3 Financial Results: US and Utilities SBU

\$ in Millions

- Higher Adjusted PTC¹ driven primarily by higher energy sales at Southland in California

1. A non-GAAP financial measure. See Appendix for definition.

Q3 Financial Results: South America SBU

\$ in Millions

- Higher Adjusted PTC¹ driven primarily by:
 - ▶ Higher contracted sales, prior year planned outage, and lower interest expense in Chile
 - ▶ Higher contract pricing in Colombia
 - ▶ Higher tariffs in Argentina following 2017 reset

1. A non-GAAP financial measure. See Appendix for definition.

Q3 Financial Results: MCAC SBU

\$ in Millions

- Lower Adjusted PTC¹ driven primarily by an unplanned outage following lightning incident at Andres in the Dominican Republic
- Partially offset by improved hydrology in Panama

1. A non-GAAP financial measure. See Appendix for definition.

Q3 Financial Results: Eurasia SBU

\$ in Millions

- Lower Adjusted PTC¹ driven primarily by sales of businesses in the Philippines and Kazakhstan

1. A non-GAAP financial measure. See Appendix for definition.

Since Announcing Goal to Achieve Investment Grade in Q3 2016, Reducing Parent Debt by \$1.2 Billion or 23%

\$ in Millions

Goal: Parent Leverage² <4x in 2019, to Achieve Investment Grade Metrics

1. Parent Debt/Last Twelve Months Parent Free Cash Flow Before Interest. December 31, 2018 assumes the mid-point of the Parent Free Cash Flow expectation of \$638 million.

Significant Delevering and Portfolio Transformation Reflected in Positive Actions by Rating Agencies

Well-Positioned to Achieve Investment Grade Metrics in 2019 and Ratings in 2020

2018 Parent Capital Allocation Plan

\$ in Millions

Discretionary Cash – Sources (\$1,966)

Discretionary Cash – Uses (\$1,966)

Allocated 84% of Discretionary Cash Toward Delevering and Dividend

1. Includes net proceeds from the sPower sell-down (US), as well as \$1,231 from the sale of Masinloc (Philippines) and Eletropaulo (Brazil).
2. A non-GAAP financial measure. See Appendix for definition and reconciliation to the nearest GAAP measure.

\$4.2 Billion in Discretionary Cash Being Generated 2018-2020

\$ in Millions

1. Includes net proceeds from the sPower sell-down (US), as well as \$1,231 from the sale of Masinloc (Philippines) and Eletropaulo (Brazil).
2. A non-GAAP financial measure. See Appendix for definition. Parent Free Cash Flow based on the mid-point of 2018 expectation of \$638, plus \$1,581 for 2019-2020 (based on the mid-point of our 8%-10% average annual growth rate off 2017 actual of \$637).

2018-2020: \$4.2 Billion of Discretionary Cash Available for Allocation

\$ in Millions

Disciplined Capital Allocation to Maximize Risk-Adjusted Total Shareholder Return

1. Commercial Operations Date.

2. Assumes constant payment of \$0.13 per share each quarter on 660 million shares outstanding.

Delivering on Financial and Strategic Objectives

- Optimizing our returns by bringing in third-party capital
- Growing our backlog to 5.7 GW
- Successfully commercializing our excess LNG capacity
- On track to achieve investment grade credit metrics by 2019 and ratings by 2020
- Generating \$4.2 billion in discretionary cash from 2018 through 2020, which we will deploy consistent with our capital allocation framework

**Reaffirming Full Year 2018 Guidance and
8%-10% Average Annual Growth Rate Target Through 2020**

2. Includes \$8 million and \$19 million of adjusted after-tax equity in earnings for Q3 2018 and Q3 2017, respectively, and \$27 million and \$32 million for YTD 2018 and YTD 2017, respectively.

YTD 2018 Adjusted EPS¹ Increased \$0.23

1. A non-GAAP financial measure. See Slide 52 for reconciliation to the nearest GAAP measure and “definitions”.

2. Gain recorded in Q1 2017.

YTD Financial Results

\$ in Millions

- Higher Adjusted PTC¹ driven primarily by:
 - ▶ South America: higher contributions from Chile, Colombia and Argentina
 - ▶ US and Utilities: higher regulated rates at DPL and energy sales at Southland in California
 - ▶ Lower Parent interest expense
 - ▶ Offset by asset sales in Philippines and Kazakhstan

1. A non-GAAP financial measure. See Slide 52 for reconciliation to the nearest GAAP measure and “definitions”.

YTD Financial Results: US and Utilities SBU

\$ in Millions

- Higher Adjusted PTC¹ driven primarily by:
 - ▶ Higher regulated rates at DPL
 - ▶ Higher energy sales at Southland in California

1. A non-GAAP financial measure. See "definitions".

YTD Financial Results: South America SBU

\$ in Millions

- Higher Adjusted PTC¹ driven primarily by:
 - ▶ Higher pricing in Argentina and Colombia
 - ▶ Higher contracted sales, prior year planned outage, and lower interest expense in Chile
 - ▶ Partially offset by the favorable settlement of a legal dispute at Uruguaiana in Brazil in 2017

1. A non-GAAP financial measure. See "definitions".

YTD Financial Results: MCAC SBU

\$ in Millions

- Higher Adjusted PTC¹ driven primarily by:
 - ▶ Improved hydrology in Panama
 - ▶ Higher contracted sales following the completion of DPP conversion, partially offset by an unplanned outage in the Dominican Republic

1. A non-GAAP financial measure. See "definitions".

YTD Financial Results: Eurasia SBU

\$ in Millions

- Lower Adjusted PTC¹ driven primarily by sales of businesses in the Philippines and Kazakhstan

1. A non-GAAP financial measure. See “definitions”.

Q3 2018 Adjusted PTC¹: Reconciliation to Public Financials of Listed Subsidiaries & Public Filers

This table provides financial data of those operating subsidiaries of AES that are publicly listed or have publicly filed financial information on a stand-alone basis. The table provides a reconciliation of the subsidiary's Adjusted PTC as it is included in AES consolidated Adjusted PTC with the subsidiary's income/(loss) from continuing operations under US GAAP and the subsidiary's locally IFRS reported net income, if applicable. Readers should consult the subsidiary's publicly filed reports for further details of such subsidiary's results of operations.

Adjustment to Depreciation & Amortization ⁵					(\$10)	(\$11)	(\$3)	(\$3)
Adjustment to Taxes					\$2	(\$20)	\$1	\$2
Other Adjustments					(\$16)	\$2	(\$7)	\$1
IFRS Net Income					\$54	\$28	\$9	\$12
BRL-USD Implied Exchange Rate							3.9124	3.1605

1. A non-GAAP financial measure. Reconciliation provided above. See "definitions" for descriptions of adjustments.
2. The listed subsidiary is a public filer in its home country and reports its financial results locally under IFRS. Accordingly certain adjustments presented under IFRS Reconciliation are required to account for differences between US GAAP and local IFRS standards.
3. Total Adjusted PTC, US GAAP Income from continuing operations and intervening adjustments are calculated before the elimination of inter-segment transactions such as revenue and expenses related to the transfer of electricity from AES generation plants to AES utilities.
4. Represents the income/(loss) from continuing operations of the subsidiary included in the consolidated operating results of AES under US GAAP.
5. Adjustment to depreciation and amortization expense represents additional expense required due primarily to basis differences of long-lived and intangible assets under IFRS for each reporting period.

Year-to-Go 2018 Guidance Estimated Sensitivities

Interest Rates¹

- 100 bps move in interest rates over year-to-go 2018 is forecasted to have a change in EPS of approximately \$0.005

Currencies

10% depreciation of USD against following currencies is forecasted to have the following EPS impacts:

Year-to-Go 2018		
	Average Rate	Sensitivity
Brazilian Real (BRL)	4.06	Less than \$0.005, Long Exposure
Colombian Peso (COP)	2,968	Less than \$0.005, Long Exposure
Euro (EUR)	1.16	Less than \$0.005, Long Exposure
Great British Pound (GBP)	1.31	Less than \$0.005, Long Exposure
Argentine Peso (ARS)	43.87	\$0.010, Long Exposure
Chilean Peso (CLP)	656	Less than (\$0.005), Short Exposure
Mexican Peso (MXN)	18.85	(\$0.010), Short Exposure

Commodity

10% increase in commodity prices is forecasted to have the following EPS impacts:

Year-to-Go 2018		
	Average Rate	Sensitivity
Illinois Basin Coal	\$39/ton	Less than (\$0.005), Short Position
Rotterdam Coal (API 2)	\$101/ton	
NYMEX WTI Crude Oil	\$73/bbl	Less than \$0.005, Long Exposure
IPE Brent Crude Oil	\$83/bbl	
NYMEX Henry Hub Natural Gas	\$3.0/mmbtu	Less than \$0.005, Long Exposure
UK National Balancing Point Natural Gas	£0.8/therm	
US Power (DPL) – PJM AD Hub	\$33/MWh	Less than \$0.005, Long Exposure

Note: Guidance provided on November 6, 2018. Sensitivities are provided on a standalone basis, assuming no change in the other factors, to illustrate the magnitude and direction of changing market factors on AES' results. Estimates show the impact on year-to-go 2018 Adjusted EPS. Actual results may differ from the sensitivities provided due to execution of risk management strategies, local market dynamics and operational factors. Full year 2018 guidance is based on currency and commodity forward curves and forecasts as of September 30, 2018. There are inherent uncertainties in the forecasting process and actual results may differ from projections. The Company undertakes no obligation to update the guidance presented. Please see Item 1 of the Form 10-K for a more complete discussion of this topic. AES has exposure to multiple coal, oil, and natural gas, and power indices; forward curves are provided for representative liquid markets. Sensitivities are rounded to the nearest \$0.005 cent per share.

1. The move is applied to the floating interest rate portfolio balances as of September 30, 2018.

1. Non-GAAP financial measures. See "definitions".

2. NCI is defined as Noncontrolling Interests.

3. Amount primarily relates to unrealized FX losses of \$20 million, or \$0.03 per share, associated with the devaluation of long-term receivables denominated in Argentine pesos, and unrealized FX losses of \$9 million, or \$0.01 per share, on intercompany receivables denominated in Euros at the Parent Company.

4. Amount primarily relates to gain on sale of Masinloc of \$773 million, or \$1.16 per share, gain on sale of Electrica Santiago of \$36 million, or \$0.05 per share, and realized derivative gains associated with the sale of Eletropaulo of \$21 million, or \$0.03 per share.

5. Amount primarily relates to loss on sale of Kazakhstan CHPs of \$48 million, or \$0.07 per share, realized derivative losses associated with the sale of Sul of \$38 million, or \$0.06 per share, and costs associated with early plant closures at DPL of \$20 million, or \$0.03 per share.

6. Amount primarily relates to the asset impairment at a U.S. generation facility of \$156 million, or \$0.23 per share.

7. Amount primarily relates to asset impairments at Kazakhstan HPPs of \$92 million, or \$0.14 per share, Kazakhstan CHPs of \$94 million, or \$0.14 per share, and DPL of \$66 million, or \$0.10 per share.

8. Amount primarily relates to loss on early retirement of debt at the Parent Company of \$169 million, or \$0.25 per share.

9. Amount primarily relates to losses on early retirement of debt at the Parent Company of \$92 million, or \$0.14 per share, partially offset by the gain on early retirement of debt at AES Argentina of \$65 million, or \$0.10 per share.

10. Amount relates to a charge to true-up the provisional estimate of U.S. tax reform of \$33 million, or \$0.05 per share.

11. Amount primarily relates to the income tax expense under the GILTI provision associated with gain on sale of Masinloc of \$155 million, or \$0.23 per share, and income tax expense associated with the gain on sale of Electrica Santiago of \$19 million, or \$0.03 per share; partially offset by income tax benefits associated with the loss on early retirement of debt at the Parent Company of \$52 million, or \$0.08 per share, and income tax benefits associated with the impairment at a U.S. generation facility of \$35 million, or \$0.05 per share.

12. Amount primarily relates to the income tax benefit associated with asset impairments of \$82 million, or \$0.12 per share.

Assumptions

Forecasted financial information is based on certain material assumptions. Such assumptions include, but are not limited to: (a) no unforeseen external events such as wars, depressions, or economic or political disruptions occur; (b) businesses continue to operate in a manner consistent with or better than prior operating performance, including achievement of planned productivity improvements including benefits of global sourcing, and in accordance with the provisions of their relevant contracts or concessions; (c) new business opportunities are available to AES in sufficient quantity to achieve its growth objectives; (d) no material disruptions or discontinuities occur in the Gross Domestic Product (GDP), foreign exchange rates, inflation or interest rates during the forecast period; and (e) material business-specific risks as described in the Company's SEC filings do not occur individually or cumulatively. In addition, benefits from global sourcing include avoided costs, reduction in capital project costs versus budgetary estimates, and projected savings based on assumed spend volume which may or may not actually be achieved. Also, improvement in certain Key Performance Indicators (KPIs) such as equivalent forced outage rate and commercial availability may not improve financial performance at all facilities based on commercial terms and conditions. These benefits will not be fully reflected in the Company's consolidated financial results.

The cash held at qualified holding companies ("QHCs") represents cash sent to subsidiaries of the Company domiciled outside of the U.S. Such subsidiaries had no contractual restrictions on their ability to send cash to AES, the Parent Company; however, cash held at qualified holding companies does not reflect the impact of any tax liabilities that may result from any such cash being repatriated to the Parent Company in the U.S. Cash at those subsidiaries was used for investment and related activities outside of the U.S. These investments included equity investments and loans to other foreign subsidiaries as well as development and general costs and expenses incurred outside the U.S. Since the cash held by these QHCs is available to the Parent, AES uses the combined measure of subsidiary distributions to Parent and QHCs as a useful measure of cash available to the Parent to meet its international liquidity needs. AES believes that unconsolidated parent company liquidity is important to the liquidity position of AES as a parent company because of the non-recourse nature of most of AES' indebtedness.

Definitions

- **Adjusted Earnings Per Share**, a non-GAAP financial measure, is defined as diluted earnings per share from continuing operations excluding gains or losses of both consolidated entities and entities accounted for under the equity method due to (a) unrealized gains or losses related to derivative transactions and equity securities; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits and costs associated with dispositions and acquisitions of business interests, including early plant closures, and the tax impact from the repatriation of sales proceeds; (d) losses due to impairments; (e) gains, losses and costs due to the early retirement of debt; (f) costs directly associated with a major restructuring program, including, but not limited to, workforce reduction efforts, relocations, and office consolidation; and (g) tax benefit or expense related to the enactment effects of 2017 U.S. tax law reform.
- **Adjusted Pre-Tax Contribution**, a non-GAAP financial measure, is defined as pre-tax income from continuing operations attributable to The AES Corporation excluding gains or losses of the consolidated entity due to (a) unrealized gains or losses related to derivative transactions and equity securities; (b) unrealized foreign currency gains or losses; (c) gains, losses, benefits and costs associated with dispositions and acquisitions of business interests, including early plant closures; (d) losses due to impairments; (e) gains, losses and costs due to the early retirement of debt; and (f) costs directly associated with a major restructuring program, including, but not limited to, workforce reduction efforts, relocations, and office consolidation. Adjusted PTC also includes net equity in earnings of affiliates on an after-tax basis adjusted for the same gains or losses excluded from consolidated entities. Adjusted PTC reflects the impact of NCI and excludes the items specified in the definition above. In addition to the revenue and cost of sales reflected in Operating Margin, Adjusted PTC includes the other components of our income statement, such as general and administrative expenses in the corporate segment, as well as business development costs, interest expense and interest income, other expense and other income, realized foreign currency transaction gains and losses, and net equity in earnings of affiliates.
- **NCI** is defined as noncontrolling interests.
- **Parent Company Liquidity** (a non-GAAP financial measure) is defined as cash available to the Parent Company plus available borrowings under existing credit facility plus cash at qualified holding companies ("QHCs"). The cash held at qualified holding companies represents cash sent to subsidiaries of the Company domiciled outside of the U.S. Such subsidiaries have no contractual restrictions on their ability to send cash to the Parent Company.
- **Parent Free Cash Flow** (a non-GAAP financial measure) should not be construed as an alternative to Net Cash Provided by Operating Activities which is determined in accordance with GAAP. Parent Free Cash Flow is equal to Subsidiary Distributions less cash used for interest costs, development, general and administrative activities, and tax payments by the Parent Company. Parent Free Cash Flow is used for dividends, share repurchases, growth investments, recourse debt repayments, and other uses by the Parent Company.
- **Subsidiary Liquidity** (a non-GAAP financial measure) is defined as cash and cash equivalents and bank lines of credit at various subsidiaries.
- **Subsidiary Distributions** should not be construed as an alternative to Net Cash Provided by Operating Activities which is determined in accordance with GAAP. Subsidiary Distributions are important to the Parent Company because the Parent Company is a holding company that does not derive any significant direct revenues from its own activities but instead relies on its subsidiaries' business activities and the resultant distributions to fund the debt service, investment and other cash needs of the holding company. The reconciliation of the difference between the Subsidiary Distributions and Net Cash Provided by Operating Activities consists of cash generated from operating activities that is retained at the subsidiaries for a variety of reasons which are both discretionary and non-discretionary in nature. These factors include, but are not limited to, retention of cash to fund capital expenditures at the subsidiary, cash retention associated with non-recourse debt covenant restrictions and related debt service requirements at the subsidiaries, retention of cash related to sufficiency of local GAAP statutory retained earnings at the subsidiaries, retention of cash for working capital needs at the subsidiaries, and other similar timing differences between when the cash is generated at the subsidiaries and when it reaches the Parent Company and related holding companies.
